

Career Cruising

At Tri County Middle and High School, our students are able to access and utilize a great career planning tool – Career Cruising!

Career Cruising is a website that includes interest inventories to find careers that may be of interest and that they can explore (to find job outlook information, education required, the colleges and universities that offer that degree, etc.), a skills inventory to help students see what they are already skilled at doing, the ability to create resumes based on all their information saved to an EDP, as well as many other resources.

It is a tool they can update on their saved EDP at anytime, so it is able to grow and mature with the student. Many students find this helpful in looking at interesting careers in middle school and in finding colleges that offer their program and financial aid information in high school, with many other opportunities as the student grows and changes along the way.

So check it out with your child today!

Just go to www.careercruising.com, our username is: *tricounty* and our password is: *password*. All middle and high school students can save their results to their own private EDP that they create and that we can access when meeting with them at school.
